Sai Erukala

Full-Stack Developer | React.js · Next.js · Node.js · TypeScript
Hyderabad, India (Open to Relocation) | +91-7989672916 | sai.erukala1508@gmail.com
LinkedIn | GitHub | Portfolio | **Immediate Joiner**

Summary

Full-Stack Developer with 3+ years of experience building production web applications with React.js, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, and MySQL. Delivered HRMS, ERP, e-commerce, and news platforms serving 300+ employees and 500+ monthly orders, including OpenAI GPT-powered features. Recently built BusinessHub, a full-stack booking platform with role-based portals, online payments, and a React Native mobile app. Strong in REST API design, database design, reusable component architecture, performance optimization, and automated testing, using AI-assisted workflows with Claude Code, Cursor, and OpenAI Codex.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Front-End: React.js, Next.js (App Router, SSR), Redux Toolkit, TanStack Query, React Hook Form, Context API, React Router, Tailwind CSS, Material UI, Vue.js, Nuxt.js
Back-End: Node.js, Express.js, REST APIs, Prisma, Zod, JWT Authentication, Role-Based Access Control, Razorpay, Swagger/OpenAPI
Databases: PostgreSQL, MySQL, MongoDB
Mobile: React Native (Expo)
Testing & DevOps: Jest, Vitest, React Testing Library, Supertest, Playwright, Git, GitHub Actions CI/CD, Vercel, Agile/Scrum
AI: OpenAI API (GPT), Claude Code, Cursor, OpenAI Codex, Prompt Engineering

Projects

BusinessHub – Appliance Repair Booking & Field-Service Platform Next.js, TypeScript, Node.js, PostgreSQL
Demo Video | GitHub

- Built a full-stack booking and field-service platform for a home-appliance repair business, with role-based portals for customers, owners, managers, and technicians, plus a React Native (Expo) mobile app.
- Designed a server-side availability engine that matches technicians by skill, working hours, and time off; prevented double booking under concurrent requests with a PostgreSQL exclusion constraint inside transactions.
- Built Express.js and Prisma REST APIs with Zod validation, JWT auth in httpOnly cookies, role and ownership checks on every endpoint, a booking status workflow, and a full audit log.
- Integrated Razorpay online payments (test mode) with server-side orders, signature verification, and webhooks; added background email notifications with pg-boss, dashboards, reports, and Swagger API docs.
- Covered APIs and key user flows with Vitest, Supertest, and Playwright end-to-end tests, run on every push in a GitHub Actions CI pipeline.

Experience

UX Crafts Nov 2024 – Jul 2026
MERN Stack Developer *Hyderabad, India*

HRMS – Human Resource Management System

- Built the React.js and Tailwind CSS front end for Employee, Attendance, Leave, Team, Projects, and Help Desk modules used daily by 300+ employees.
- Designed Node.js, Express.js, and MySQL REST APIs for attendance tracking, multi-level leave approvals, and help desk ticketing.
- Built an AI-powered HR Assistant with the OpenAI GPT API that answers employee questions on leave, attendance, reimbursements, holidays, and company policies.
- Added form validation, search, and filtering across modules, reducing data-entry errors and manual HR follow-ups.
- Wrote Jest and React Testing Library tests for critical flows, catching regressions before production releases.

TG Agros ERP

- Developed Sales, Purchasing, and Inventory modules in React.js with Redux Toolkit and a shared library of reusable Material UI components.
- Built Node.js and Express.js REST APIs on PostgreSQL, handling large data tables with server-side pagination and lazy loading.
- Integrated the OpenAI API to generate inventory recommendations from stock and recent sales data, flagging likely shortages and reorder priorities.
- Cut initial load time by ∼30% using route-based code splitting, lazy loading, and React.memo.

Swechaa News Portal & E-Paper

- Built a React.js, Node.js, Express.js, and PostgreSQL content dashboard to publish news articles, e-paper editions, and category-wise short news.
- Implemented REST APIs with role-based access for editors and admins, media uploads, and live content updates on the public portal.

Kwikkoder IT Solutions Jun 2023 – Nov 2024
React Developer *Hyderabad, India*

Sri Lakshmi Kalamkari – E-Commerce Platform

- Built a server-rendered e-commerce storefront with Next.js and Tailwind CSS, including Product Catalog, Cart, and Checkout, supporting 500+ monthly orders.
- Improved SEO and page speed with Next.js server-side rendering and reusable React components, achieving Lighthouse scores above 90.
- Integrated Node.js and PostgreSQL REST APIs for catalog, search, and order management, with mobile-first checkout layouts.

Education

Full-Stack Web Development (MERN Stack) – NxtWave 2022 – 2023
B.Tech, Mechanical Engineering – Malla Reddy Engineering College, Hyderabad 2017 – 2021
Diploma, Mechanical Engineering – Jyothishmathi Institute of Technology, Karimnagar 2014 – 2017
