Sai E

Full-Stack Developer | React.js · Next.js · React Native · Node.js · TypeScript
Hyderabad, India (Open to Relocation) | +91-7989672916 | sai.erukala1508@gmail.com
LinkedIn | GitHub | Portfolio | **Immediate Joiner**

Summary

Full-Stack Developer with 3+ years of experience building production web applications with React.js, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, and MySQL. Delivered HRMS, ERP, e-commerce, and news platforms serving 300+ employees and 500+ monthly orders, including OpenAI GPT-powered features. Recently built BusinessHub, a full-stack booking platform with role-based portals and online payments, and its React Native (Expo) mobile app for customers, technicians, and staff. Strong in REST API design, database design, reusable component architecture, performance optimization, and automated testing, using AI-assisted workflows with Claude Code, Cursor, and OpenAI Codex.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Front-End: React.js, Next.js (App Router, SSR), Redux Toolkit, TanStack Query, React Hook Form, Context API, React Router, Tailwind CSS, Material UI, Vue.js, Nuxt.js
Mobile: React Native, Expo (Expo Router, EAS Build), React Native Paper, Expo Secure Store, Razorpay Native SDK, Android
Back-End: Node.js, Express.js, REST APIs, Prisma, Zod, JWT Authentication, Role-Based Access Control, Razorpay, pg-boss, Nodemailer, Swagger/OpenAPI
Databases: PostgreSQL, MySQL, MongoDB
Testing & DevOps: Jest, Vitest, React Testing Library, Supertest, Playwright (web and mobile E2E), Git, GitHub Actions CI/CD, Vercel, Agile/Scrum
AI: OpenAI API (GPT), Claude Code, Cursor, OpenAI Codex, Prompt Engineering

Experience

UX Crafts Nov 2024 – Jul 2026
MERN Stack Developer *Hyderabad, India*
HRMS – Human Resource Management System

- Built the React.js and Tailwind CSS front end for Employee, Attendance, Leave, Team, Projects, and Help Desk modules used daily by 300+ employees.
- Designed Node.js, Express.js, and MySQL REST APIs for attendance tracking, multi-level leave approvals, and help desk ticketing.
- Built an AI-powered HR Assistant with the OpenAI GPT API that answers employee questions on leave, attendance, reimbursements, holidays, and company policies.
- Added form validation, search, and filtering across modules, reducing data-entry errors and manual HR follow-ups.
- Wrote Jest and React Testing Library tests for critical flows, catching regressions before production releases.

TG Agros ERP

- Developed Sales, Purchasing, and Inventory modules in React.js with Redux Toolkit and a shared library of reusable Material UI components.
- Built Node.js and Express.js REST APIs on PostgreSQL, handling large data tables with server-side pagination and lazy loading.
- Integrated the OpenAI API to generate inventory recommendations from stock and recent sales data, flagging likely shortages and reorder priorities.
- Cut initial load time by ∼30% using route-based code splitting, lazy loading, and React.memo.

Swechaa News Portal & E-Paper

- Built a React.js, Node.js, Express.js, and PostgreSQL content dashboard to publish news articles, e-paper editions, and category-wise short news.
- Implemented REST APIs with role-based access for editors and admins, media uploads, and live content updates on the public portal.

Kwikkoder IT Solutions Jun 2023 – Nov 2024
React Developer *Hyderabad, India*
Sri Lakshmi Kalamkari – E-Commerce Platform

- Built a server-rendered e-commerce storefront with Next.js and Tailwind CSS, including Product Catalog, Cart, and Checkout, supporting 500+ monthly orders.

- Improved SEO and page speed with Next.js server-side rendering and reusable React components, achieving Lighthouse scores above 90.
- Integrated Node.js and PostgreSQL REST APIs for catalog, search, and order management, with mobile-first checkout layouts.

Projects

BusinessHub – Repair Booking Platform (Web + Mobile) Next.js, React Native, Node.js, PostgreSQL
Web: Demo Video | GitHub Mobile: Demo Video | GitHub Backend: GitHub

- Built a full-stack booking and field-service platform for a home-appliance repair business: a Next.js web app and a React Native (Expo) mobile app for customers, technicians, managers, and owners on one shared REST API.
- Designed a server-side availability engine that matches technicians by skill, working hours, and time off; prevented double booking under concurrent requests with a PostgreSQL exclusion constraint inside transactions.
- Built Express.js and Prisma REST APIs with Zod validation, JWT auth (httpOnly cookies on web, secure-keystore Bearer tokens on mobile), role and ownership checks on every endpoint, a booking status workflow, and a full audit log.
- Integrated Razorpay payments (test mode) with server-side orders, signature verification, and webhooks, including the native mobile checkout tested on a real Android device.
- Added background email notifications with pg-boss and Nodemailer (booking updates, 24h/2h reminders) and 6-digit one-time codes for password reset, email verification, and invites in the mobile app.
- Covered APIs and key flows with Vitest, Supertest, and Playwright end-to-end tests on desktop and phone-sized screens, run in a GitHub Actions CI pipeline.

Education

Full-Stack Web Development (MERN Stack) – NxtWave 2022 – 2023
B.Tech, Mechanical Engineering – Malla Reddy Engineering College, Hyderabad 2017 – 2021
Diploma, Mechanical Engineering – Jyothishmathi Institute of Technology, Karimnagar 2014 – 2017
